BRICS — Executive Business Proposal

Step 1: Initial Pitch & Solution Overview | TVAM KEY SOFTWARE PRIVATE LIMITED

1. Executive Summary & Industry Challenge

Brick Kiln and Chimney operations face severe operational leakage, manual record manipulation, unmonitored advance payments to Sardars/labour, fuel (coal/diesel) pilferage, and delayed GST reconciliation. Current accounting tools fail to track the physical manufacturing lifecycle (Soil -> Green Bricks -> Firing -> Sorted Stock).

2. The BRICS Solution Architecture

BRICS is an integrated, single-source-of-truth ERP system specifically engineered for the brick manufacturing industry by TVAM KEY SOFTWARE PRIVATE LIMITED. Operations recorded at the kiln instantly trigger inventory updates and double-entry accounting journal entries in real time.

3. Key Ecosystem Modules

- **Field Supervisor App (Mobile)**: Offline-first mobile tool for daily brick counting, labour attendance, raw material GRN, and dispatch challan generation.
- **Owner & Admin Web Panel**: Centralized dashboard for real-time stock valuation, multi-kiln monitoring, receivables aging, and profitability analytics.
- **Labour & Sardar Engine**: Manages piece-rate wages (per 1,000 bricks), cash advances, loan deductions, and seasonal wage settlements.
- **Integrated Financial Accounting Engine**: Complete Chart of Accounts, Day Book, General Ledger, Trial Balance, P&L;, Balance Sheet, and GSTR-1/3B reporting.

4. Financial Economics & Client ROI

Based on standard industry benchmark data:

Cost / Revenue Component	Amount per 1,000 Bricks (INR)	Percentage of Cost
Labour Wages	■1,200	29.2%
Coal / Fuel Procurement	■1,700	41.5%
Soil / Clay Acquisition	■500	12.2%
Electricity & Power	■150	3.7%
Loading & Unloading Fees	■250	6.1%
Repairs & Maintenance	■150	3.7%
Misc Overheads	■150	3.7%
Total Production Cost	**■4,100 / 1,000 Bricks**	**100%**

Average Selling Price	**■6,500 / 1,000 Bricks**	—
Estimated Gross Margin	**■2,400 / 1,000 Bricks**	**36.9% Margin**

BRICS ROI Impact: Eliminates 5-8% inventory leakage and over-reported labour costs, saving an estimated **■3,50,000 to ■6,00,000 per season** per kiln.
